## District Sustainability Progress

The District has multiple sustainability goals across the energy, waste, and water nexus. Progress towards these goals is measured on an annual basis to celebrate our successes and identify areas of improvement.

**Click on a graphic below** to learn more about the specific goal and our progress towards achieving it.

## Environmental Justice

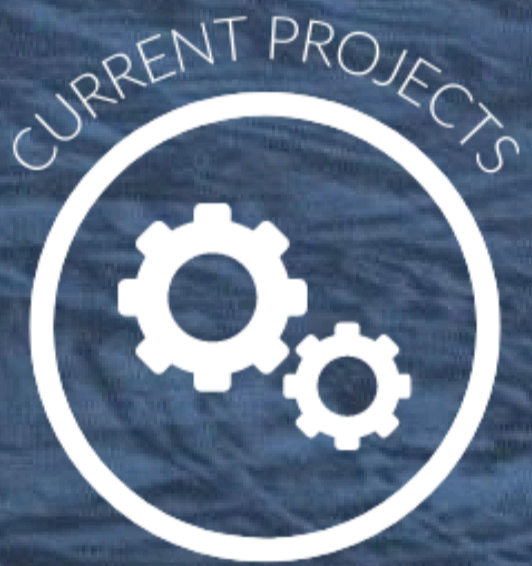

As a community college district, SMCCCD strives to increase access to educational resources and empower students to become decision-makers for equitable climate change solutions. Understanding and applying environmental justice principles is critical to that mission.

## Campus as a Living Lab

Embracing an active learning environment, students partner with staff and faculty to gain hands-on experience solving sustainability issues. See how you can bring hands-on sustainability learning to your classroom.
