

13-year-old Maxine loves animals, surfing, dancing and music. She is also a member of the Young Fire Fighters learning to help people in emergency situations. Right now, she needs YOUR help. Maxine was diagnosed with severe aplastic anemia, a rare blood disorder. A blood stem cell transplant is her only cure, but like so many patients, Maxine is without a life-saving match. ARE YOU HER MATCH?

#### ODDS OF FINDING A MATCH BASED ON ETHNIC BACKGROUND

Patients are most likely to match with donors who share the same ethnic background.
